		15-16

PSYC 410 ⁴	Advanced Research	3
PSYC	Psychology Elective	3
FREE	Free Elective	3
FREE	Free Elective	3
FREE	Free Elective	4
		16

Sequence of courses may be altered with advisor's approval; a total of 128 credits are needed for graduation.

NOTE 1: Students MUST complete a minor or second major. Depending on the intended graduate school goal, it may serve you best to complete BIOL 111 with lab as your science and higher math than MATH 101. If the minor requires more than 3-credits per class, a student does not need as many free electives. Once the minor requirement is met, a student can fill in with free elective(s). The total credits needed by graduation must equal 128.

NOTE 2: This requirement can also be satisfied with LIT 201, 202, 204, 207, or 270.

NOTE 3: The Writing Competency Exam (WCE) must be completed and passed in the junior year; if it is not the student will be automatically enrolled in CORE 199, a 1-credit writing course that will help improve writing skills.

NOTE 4: PSYC 410 and 322 = even-numbered year spring semester. PSYC 323 = odd-numbered year spring semester. PSYC 302 = odd-numbered year fall semester. Please plan your schedule accordingly.

NOTE 5: This requirement can be satisfied with one of these courses: BIOL 103, BIOL 104, BIOL 105, CHEM 105, PHYS 101, or PHYS 102. This requirement can also be satisfied with any natural science, computer science, or engineering course that has an associated lab, if the lab is also completed.
